Overview

- Disability of various types is common
- Multi-disabilities are common
- Establish a People first mentality
- There are certain topics we should be teaching
- Accommodations should be documented
- Attitudinal and Work force changes are necessary that focus on inclusion mindset
- Advocacy for people and for resources access is important
- Telehealth has many possibilities for teaming about complex patients and for counseling services for people with diverse disabilities

Disparities in care are a reality

Disability and Healthcare ACCESS

Healthcare access barriers for working-age adults include

adults with disabilities (18-44 years)

do not have a usual healthcare provider

adults with disabilities (18-44 years)

have an unmet healthcare need beacause of cost in the past year

adults with disabilities

(45-64 years)

did not have a routine check-up in the past year

COVID-19: A Conversation About Health Disparities

Changes related to COVID

- Disparities in care are momentous
- The lives of people with disabilities were not valued to the same degree as able bodied people during Covid
- Acknowledgement of a need for change
- Virtual platforms make team case discussions far more possible
- How do we advocate?
- How can we expand telehealth to meet the needs and think about the population based need?
